

Please save the date for an exciting upcoming event focused on the concept of the Power Of Three, which is the collaboration and synergy between our local, state, and national dental associations.

On Thursday, March 22nd, three speakers will represent the different levels of the tripartite organization. Kamyar Nasseh, PhD, Health Economist at the ADA's Health Policy Institute, will present data about the state of dentistry from a national level and give us an idea of how Wisconsin compares. Dr. Dave Clemens, our WDA president, will speak about issues at the state level touching upon legislative issues like the status on EFDA's as well as the Transparency for Dentist Insurance Contracts Bill. He will provide an update on our Medicaid Pilot Program and touch upon the concerns of dentists from across our state. Dr. Angela Lueck, our GMDA president, will speak about issues at the component level. She will discuss the positive trends within our component highlighting the progress of the last two years and what we have to look forward to in upcoming years.

This will be a wonderful opportunity to receive relevant information regarding current happenings in organized dentistry. The Greater Milwaukee Dental Association is hosting this event in the hopes of providing members with a fun, relaxed way to stay current, connected, and informed. Please join us on Thursday, March 22nd at Bluemound Country Club. Watch your email and snail mail for sign up details.
